

Dr. Hagi's Answers

Other Answers / Notes

1. How many appointments will it take?

After your Initial Free Consultation, you will have your new teeth in as few as Four Appointments.

2. How many appointments will it take?

None. You don't have to go anywhere else. We do everything at the DH Smile Center.

3. How long will I be without teeth?

One Night. The single final bridge is placed in just 1 visit often within 24 hours of surgery.

4. How many dental implants will I need to support my full-arch bridge?

Most patients only need as few as Four implants. *However, Dr. Hagi will determine the number of implants required for your full-arch bridge based on your individual needs.*

5. Will I need bone-grafting to support my implants?

Most patients don't need bone-grafting. However, it may be required for patients suffering from extreme bone loss in their jaws.

6. Will I have a temporary bridge before I get my final bridge?

Yes. You will get a Provisional bridge the day after your implants. The Provisional bridge is usually already made the time you walk in to our clinic. This means your implants are usually placed in 3 hours or less. Cutting the typical procedure time nearly in half!

7. How soon can I get my final bridge?

You will wear your Provisional bridge for 3 to 6 months. During this time, your implants will stabilize and you will become perfectly accustomed to a full arch of teeth and gums.

8. How long will my bridge last?

Your custom-made Prettau Zirconia bridge is designed to last at least 15 years. With a success rate of over 99%. The Prettau Zirconia bridge often lasts longer than 15 years for most patients. Make sure to brush regularly and come in for regular checkups to maintain optimal oral health.

9. What materials do you use to make my bridge?

Your final bridge is custom-milled from a single solid piece of Prettau Zirconia. We craft it specifically to suit your individual and personal smile requirements.

10. Will my bridge ever lose colour, stain or retain odours?

Prettau Zirconia is non-porous. This means that it doesn't stain, lose colour or attract or retain odours. The bridge is your teeth and that's how you should care for them.

Brushing twice a day. Most other bridge materials like acrylics are prone to both stains and odours.

11. How likely is my bridge to build up plaque and harmful bacteria?

Since Prettau Zirconia is non-porous and resistant to stains and odours. It doesn't attract plaque or the harmful bacteria that breeds in the plaque build-up either.

12. What are the chances that my bridge will chip, break or need replacement?

With an over 99% success rate, the Prettau Zirconia bridge is the strongest aesthetic dental material today. Meaning that it is chip and wear resistant. Almost no patients require a replacement bridge unless they have been in a serious accident causing the bridge to crack or break.

13. Will my bridge wear down from chewing and talking?

Prettau Zirconia is the strongest aesthetic dental material available today. It is harder than acrylic and is extremely resistant to chipping, cracking and breaking (for the heavy grinders).

14. How likely am I to develop an infection under my bridge?

Infections are caused by harmful bacteria that breed under plaque build ups. The fact that Prettau Zirconia does not attract plaque means that there is a minimal risk of developing an infection. Since there is no build up for the bacteria to breed in. Be sure to brush regularly to maintain optimal health for your bridge.

15. What guarantee do you provide on your dental work?

We provide a **5 YEAR guarantee** on all of our All-on-4 treatments. All of our dental procedures under warranty will be covered by us at 100% no cost to you. We stand by our commitment to you. **That's why we include 1 YEAR of maintenance. AND use Premium Components to increase the longevity of your dental implants.**
